

Municipal Database System: Executive Summary for Pilot Testing

1. Project Overview

The Municipal Database is a secure, web-based platform designed to centralize and visualize critical data across all our barangays. It provides a real-time overview of our municipality's demographics, economy, infrastructure, and governance.

The system is organized into five main departments:

1. Social Development
2. Economic Development
3. Infrastructure
4. Governance (*Strictly Confidential*)
5. Institutional GAD (Gender and Development)

2. Data Collected by Department

The system collects highly granular, sex-disaggregated data (broken down by Male and Female) across various sectors to ensure inclusive planning and monitoring. The current data points collected per barangay include:

Demographics & Population

- **Population:** Total Population (Male/Female)
- **Households:** Household Heads (Male/Female)
- **Vulnerable Sectors:** Solo Parents, Persons with Disabilities (PWD), 4Ps Beneficiaries, and Senior Citizens (Male/Female)

Social Development

- **Education:** Student Enrollment, School Drop-outs, and Out-of-School Youth (Male/Female)
- **Health:** Malnourished / Stunted Children (Male/Female)
- **General Health:** Teenage Pregnancy (Total) and Maternal Mortality (Total)

Economic Development

- **Employment:** Employed vs. Unemployed citizens (Male/Female)
- **Livelihood:** Registered Farmers, Fisherfolks, Business Owners, and Ambulant Vendors (Male/Female)

Infrastructure

- **Basic Needs:** Access to Safe Water and Sanitary Toilets in households (Male/Female headed)
- **Housing:** Informal Settler Families (Male/Female headed)

Governance (Confidential)

- **Leadership:** Elected Officials and Appointed Heads (Male/Female)
- **Incidents:** Children in Conflict with the Law (CICL) and Sexual Assault Cases (Male/Female)
- **General Incidents:** Violence Against Women and Children (VAWC) Cases (Total)

Institutional GAD

- **Budgeting:** Total LGU budget, GAD allocated amount, and GAD utilized amount
- **Training:** Number of GAD trainings and total participants trained

3. Who Can Access What? (Access Control)

To ensure data privacy and security, the system uses a strict role-based access system. Users can only see or change data they are authorized to access.

User Role	What They Can Do	Which Departments They Access
System Administrator	Full control. Can manage user accounts, oversee the entire system, and review all activity logs.	All Departments
Executive Viewer	Can view all data across the municipality, including confidential Governance records, but cannot make any changes.	All Departments
Department Head	Can view, add, and update records, but only for their specific assigned department.	Their Department Only

Department Staff	Can view records for their department, but cannot make any changes.	Their Department Only
General Viewer	Can view general public data across the municipality, but cannot see any confidential Governance data.	General Data Only

4. Data Security & Tracking

- **Strict Boundaries:** A Department Head for "Social Development" cannot see or change data in the "Infrastructure" section.
- **Confidentiality:** Governance data is strictly hidden from general staff and viewers.
- **Activity Tracking:** Every single time a user adds, edits, or deletes a record, the system automatically logs who did it, when they did it, and what was changed. This ensures complete accountability during the pilot test.

5. Dashboards and Visual Insights

The system automatically turns raw data into easy-to-read visual dashboards for quick decision-making.

All dashboards feature interactive filters, allowing you to instantly switch between viewing the entire municipality or zooming in on a single, specific barangay, as well as filtering by year.

- **Municipal Overviews:** At the top of every dashboard, large summary cards show total numbers (e.g., "Total Enrolled Students" or "Total Employed Citizens").
- **Barangay Comparisons:** Bar charts allow you to compare different barangays side-by-side (e.g., comparing the number of employed males vs. females across all barangays).
- **Demographic Breakdowns:** Circular charts show the specific breakdown of groups within a selected area.
